“ Dear Solano family, I didn't know your mother, but she sounds like an interesting person. I wish I would of met her, what caught my interest was that she was a PBX operator. I too was one at the old Caney Valley Hospital in Wharton, TX when I was going to college working the 11-7 shift. It worked out because when I got off work I would drive to the college. When I tell people I was a PBX Operator they kind of look at me funny. May your mother rest in peace and may the perpetual light shine upon her. Augie & Terri Beltran
