JM

“ *Larry Mitchell was a very smart and conscientious man who was a great Construction Manager. He was down to earth and fair in all his dealings. Met and worked with him on a large PACCAR engine plant a few years ago. He will be missed very much.*

“ *I had the pleasure of knowing Larry for many, many years and working with him on several projects. He was a down to earth guy that knew how to get things done and a leader that made sure things were done safely and the right way. I especially will miss his wry wit and great sense of humor. He always looked out for his friends. I will miss him dearly...*
