“ *My thoughts and prayers go out to the Morrison family. Tom worked with me at Rice Farmers Coop for several years. He was most likely the smartest employee that we had ever had the pleasure of employing. When he found out that I had a degree in mathematics it really became a challenge. Not for him but for me. He gave me several magazine that specialized in math. We would discuss the material, but he and the articles were way over my head. He was a joy to work with and visit with. The coop was his drop off point for items that were shipped to him family members and stuff that he would order. I looked forward to Tom coming by to pick them up and our visits. Like many other times like this I wish I would have taken more time to visit and learn from Tom. Tom will be missed by his friends at the coop.*

*Sincerely,
Bob Little*
